

Midtherm Continuing to manufacture and supply-

02 Nov 2020

Acting on latest government guidance, Manufacturing at Midtherm will continue to produce products in all areas.

During these difficult times we are aware that our stock levels are lower than normal, due to lack of production earlier in the year, this along with higher demand than expected, slower raw material deliveries and occasional isolation of staff members, is creating delays in some areas. Midtherm staff are working hard to satisfy customers requirements and maintain reasonable lead times.
